Parameter transient tracking for recursive estimation. R. Fernandez del Busto, P.E. Wellstead and M.B. Zarrop p68
Robustness effects of a prefilter in generalised predictive control. B.D. Robinson and D.W. Clarke p2
Self-adaptive design of a nonlinear temperature control system. A. Chotai, P.C. Young and M.A. Behzadi p41
Self-organising fuzzy logic control and application to muscle relaxant anaesthesia. D.A. Linkens and S.B. Hasnain p274
Self-tuning predictive PID controller. P. Vega, C. Prada and V. Aleixandre p303

AVIONICS

Distributed artificial intelligence approach to air traffic control. N.V. Findler and R. Lo p515

CLOSED-LOOP SYSTEMS

Decoupling and pole assignment in generalised state space systems. P.N. Paraskevopoulos and F.N. Koumboulis p547
Optimal tracking with previewed commands. M.E. Halpern p237
Unifying approach to observers for regular and singular systems. P.N. Paraskevopoulos and F.N. Koumboulis p561

COMPUTER APPLICATIONS

RESCU: a real-time knowledge based system for process control. R. Leitch, R. Kraft and R. Luntz p217

COMPUTER-AIDED DESIGN

Expert system for SROOT. P.A. Muha p381
Sequential design of multivariable control systems. J. Van de Vegte p103

CONTROL EQUIPMENT AND APPLICATIONS

Adaptive control of a single-link flexible manipulator with unknown load. T.-C. Yang, J.C.S. Yang and P. Kudva p153
Application of stochastic optimal control to thin rib machining. M. Anjanappa, D.K. Anand and J.A. Kirk p228
Improvement of greenhouse heating control. P.F. Davis and A.W. Hooper p249
Multivariable and multirate self-tuning control: a distillation column case study. M.T. Tham, F. Vagi, A.J. Morris and R.K. Wood p9
Multivariable self-tuning regulator for load frequency control system with interaction of voltage on load demand. K. Yamashita and H. Miyagi p177
Sequential design of multivariable control systems. J. Van de Vegte p103

CONTROL SYSTEMS

Agile computer control and surveillance systems. R. Whalley p185
Application of generalised predictive control to a boiler-turbine unit for electricity generation. J.A. Rossiter, B. Kouvaritakis and R.M. Dunnett p59
Composite dynamic and steady-state approach to stochastic optimising control of steady-state systems with output dependent constraints. J. Lin, M. Wang and P.D. Roberts p123
Constrained receding-horizon predictive control. D.W. Clarke and R. Scattolini p347
Constrained variance design for bilinear stochastic continuous systems. H.-Y. Chung and W.-J. Chang p145
Decoupling of descriptor systems. N. Minamide, P.N. Nikiforuk and M.M. Gupta p453
Design and implementation of self-tuning active noise control systems. M.O. Tokhi and R.R. Leitch p421
Design of integral variable structure controller and application to electrohydraulic velocity servosystems. T.-L. Chern and Y.-C. Wu p439
Determination of transfer function of two dimensional generalised systems using the discrete Fourier transform. G.E. Antoniou, S.E. Mentzelopoulou and G.O. Glentis p327
Elevator scheduling system using blackboard architecture. G.K.H. Pang p337
Frequency-domain approach to state-space LQG self-tuning control. T.J. Moir p372
Gain margins and phase margins for sampled-data control systems with adjustable parameters. C.-H. Chang and K.-W. Han p285
Geometric approach for fault diagnosis in linear dynamic control systems. J.H. Kim and Z. Bien p293
Improvement of greenhouse heating control. P.F. Davis and A.W. Hooper p249
Iterative learning control method for discrete-time dynamic systems. D.-H. Hwang, Z. Bien and S.-R. Oh p139
Linear feedback approach to the stabilisation of uncertain discrete systems. E. Gyurkovics p507
Model reference control of nonlinear plants with uncertain and unbounded terms. Y. Stepanenko and J. Yuan p535
New method of robust pole assignment by output feedback. J. Changsheng p172
On the design of position control systems. J. Billingsley p331
Optimal controller with prescribed dominant energy eigenvalues. C.M. Liaw p405
Optimal model-following control of a positioning drive system with a permanent-magnet synchronous motor. P.M. Pelczewski, W. Oberschelp and U.H. Kunz p267
Optimal tracking with previewed commands. M.E. Halpern p237
Refinements of the Ziegler–Nichols tuning formula. C.C. Hang, K.J. Åström and W.K. Ho p111
Robust low order dynamic controller for flexible spacecraft. M. Seetharama Bhat, A.G. Sreenatha and S.K. Shrivastava p460
Rule based identifier for unknown systems. H. Wang and A.H. Jones p500
Single-channel controllability of interconnected systems. P. Fessas and M. Mansour p207
Sliding mode control of remotely operated vehicles for horizontal plane motions. N. Olgac, B.E. Platin and J.-M. Chang p469
Tracking periodic inputs using sampled compensators. G.F. Ledwich and A.G. Bolton p242
Variable structure control strategy to automatic generation control of interconnected reheat thermal system. D. Das, M.L. Kothari, D.P. Kothari and J. Nanda p579

CONTROL THEORY

Adaptive general predictive controller for nonlinear systems. Q.M. Zhu, K. Warwick and J.L. Douce p33
Composite dynamic and steady-state approach to stochastic optimising control of steady-state systems with output dependent constraints. J. Lin, M. Wang and P.D. Roberts p123
Constrained receding-horizon predictive control. D.W. Clarke and R. Scattolini p347
Decoupling of descriptor systems. N. Minamide, P.N. Nikiforuk and M.M. Gupta p453
Design of integral variable structure controller and application to electrohydraulic velocity servosystems. T.-L. Chern and Y.-C. Wu p439
Discrete-time optimal control for linear time-delay systems with deterministic disturbances. T.-T. Lee and C.-L. Shih p573
Effects of lag controllers on transient response. W. Ali and J.H. Burghart p119
Eigenstructure assignment in high-gain feedback systems. S. Sen and K.B. Datta p165
Elevator scheduling system using blackboard architecture. G.K.H. Pang p337
Generalised minimum-variance stochastic self-tuning controller with pole restriction. C.C. Hang, K.W. Lim and W.K. Ho p25
Hybrid state-space self-tuning control using dual-rate sampling. L.S. Shieh, X.M. Zhao and J.W. Sunkel p50
Identification for long-range predictive control. D.S. Shook, C. Mohtadi and S.L. Shah p75
Integral equation approach to joint state and parameter estimation in continuous-time MIMO systems. S. Mukhopadhyay and G.P. Rao p93
Iterative learning control method for discrete-time dynamic systems. D.-H. Hwang, Z. Bien and S.-R. Oh p139
Linear feedback approach to the stabilisation of uncertain discrete systems. E. Gyurkovics p507
Multivariable and multirate self-tuning control: a distillation column case study. M.T. Tham, F. Vagi, A.J. Morris and R.K. Wood p9
Multivariable decoupling pole assignment self-tuning feedforward controller. Z.-L. Deng and X.-R. Huang p85
Multivariable self-tuning regulator for load frequency control system with interaction of voltage on load demand. K. Yamashita and H. Miyagi p177
New bound for the stability margin of linear continuous systems. V. Sreeram and P. Agathoklis p151
Observations-weighted optimal control of a class of nonlinear systems. M.J. Grimble and S.A. Carr p160
Parameter transient tracking for recursive estimation. R. Fernandez del Busto, P.E. Wellstead and M.B. Zarrop p68
Petri nets based approach to software development for real-time control. P. Cofrancesco, A. Cristoforetti and R. Scattolini p474
Phase margin of linear time invariant systems from Routh array. V. Krishnamurthi, W.K. Sa'id and N.A. Al-Awad p410
RESCU: a real-time knowledge based system for process control. R. Leitch, R. Kraft and R. Luntz p217
Rational function matrices and structural controllability and observability. K.S. Lu and J.N. Wei p388
Recursive approach to optimal control problem of multiarea electric energy system. J.A. Momoh and X. Shen p543
Refinements of the Ziegler–Nichols tuning formula. C.C. Hang, K.J. Åström and W.K. Ho p111
Robust H_∞ control for class of uncertain linear time-invariant systems. L. Xie and C.E. de Souza p479
Robust low order dynamic controller for flexible spacecraft. M. Seetharama Bhat, A.G. Sreenatha and S.K. Shrivastava p460
Robustness effects of a prefilter in generalised predictive control. B.D. Robinson and D.W. Clarke p2

CYBERNETICS AND ROBOTICS

Adaptive control of a single-link flexible manipulator with unknown load. T.-C. Yang, J.C.S. Yang and P. Kudva p153
Asymptotic observer design for constrained robot systems. H.-P. Huang and W.-L. Tseng p211
Design of robotic discrete minimum energy regulator. Y. Bestaoui p509
Initial condition problem of learning control. K.H. Lee and Z. Bien p525
Model reference control of nonlinear plants with uncertain and unbounded terms. Y. Stepanenko and J. Yuan p535
Sliding mode control of remotely operated vehicles for horizontal plane motions. N. Olgac, B.E. Platin and J.-M. Chang p469

DESIGN

Constrained variance design for bilinear stochastic continuous systems. H.-Y. Chung and W.-J. Chang p145
Controller design of multivariable variable structure systems with nonlinear switching surfaces. D.S. Lee, M.G. Kim, H.K. Kim and M.J. Youn p493
Expert system for SROOT. P.A. Muha p381

DIGITAL COMPUTERS AND COMPUTATION

Tracking periodic inputs using sampled compensators. G.F. Ledwich and A.G. Bolton p242

FAULT DETECTION

Geometric approach for fault diagnosis in linear dynamic control systems. J.H. Kim and Z. Bien p293

FEEDBACK

Algorithm to produce a system of type number *m* using state variable feedback. M. O'Malley p193
Chaos prediction in nonlinear feedback systems. R. Genesio and A. Tesi p313
Decoupling and pole assignment in generalised state space systems. P.N. Paraskevopoulos and F.N. Koumboulis p547
Eigenstructure assignment in high-gain feedback systems. S. Sen and K.B. Datta p165
Feedback stabilisation of synchronous generator by extended linearisation. P. Woźniak and K. Kuźmiński p363
Linear feedback approach to the stabilisation of uncertain discrete systems. E. Gyurkovics p507
New method of robust pole assignment by output feedback. J. Changsheng p172
Sequential design of multivariable control systems. J. Van de Vegte p103

FILTERS AND FILTERING

Fully decentralised algorithm for multisensor Kalman filtering. B.S. Rao and H.F. Durrant-Whyte p413
Identification for long-range predictive control. D.S. Shook, C. Mohtadi and S.L. Shah p75
Influence of Poisson filter constant on estimation of continuous-time models. B.K. Roy, V.N. Bapat and D.C. Saha p586
Optimal tracking with previewed commands. M.E. Halpern p237
Robustness effects of a prefilter in generalised predictive control. B.D. Robinson and D.W. Clarke p2

INSTRUMENTATION AND MEASURING SCIENCE

Strip speed measurement using distributed infra-red detectors. E.M. Deeley and P. Kontopoulous p395

LOGIC

Self-organising fuzzy logic control and application to muscle relaxant anaesthesia. D.A. Linkens and S.B. Hasnain p274

MATHEMATICAL TECHNIQUES

Adaptive general predictive controller for nonlinear systems. Q.M. Zhu, K. Warwick and J.L. Douce p33
Algorithm to produce a system of type number *m* using state variable feedback. M. O'Malley p193
Analysis of singular bilinear systems using Walsh functions. F.L. Lewis, B.G. Mertzios and W. Marszalek p89
Application of generalised predictive control to a boiler-turbine unit for electricity generation. J.A. Rossiter, B. Kouvaritakis and R.M. Dunnett p59
Artificial neural networks in process engineering. M.J. Willis, C. Di Massimo, G.A. Montague, M.T. Tham and A.J. Morris p256
Eigenstructure assignment in high-gain feedback systems. S. Sen and K.B. Datta p165
Frequency-domain approach to state-space LQG self-tuning control. T.J. Moir p372
Fully decentralised algorithm for multisensor Kalman filtering. B.S. Rao and H.F. Durrant-Whyte p413
Gain margins and phase margins for sampled-data control systems with adjustable parameters. C.-H. Chang and K.-W. Han p285
Generalised minimum-variance stochastic self-tuning controller with pole restriction. C.C. Hang, K.W. Lim and W.K. Ho p25
Integral equation approach to joint state and parameter estimation in continuous-time MIMO systems. S. Mukhopadhyay and G.P. Rao p93
Iterative learning control method for discrete-time dynamic systems. D.-H. Hwang, Z. Bien and S.-R. Oh p139
Multivariable decoupling pole assignment self-tuning feedforward controller. Z.-L. Deng and X.-R. Huang p85
Optimal controller with prescribed dominant energy eigenvalues. C.M. Liaw p405
Parameter transient tracking for recursive estimation. R. Fernandez del Busto, P.E. Wellstead and M.B. Zarrop p68
Rational function matrices and structural controllability and observability. K.S. Lu and J.N. Wei p388
Robust identification of stochastic linear systems with correlated noise. C.-B. Feng and W.-X. Zheng p484
Self-adaptive design of a nonlinear temperature control system. A. Chotai, P.C. Young and M.A. Behzadi p41
Self-tuning predictive PID controller. P. Vega, C. Prada and V. Aleixandre p303
Solution of the Lyapunov equation with system matrix in companion form. V. Sreeram and P. Agathoklis p529
Tracking periodic inputs using sampled compensators. G.F. Ledwich and A.G. Bolton p242
Transputer implementation of Kalman filters. L.P. Maguire and G.W. Irwin p355

MULTIVARIABLE CONTROL SYSTEMS

Application of generalised predictive control to a boiler-turbine unit for electricity generation. J.A. Rossiter, B. Kouvaritakis and R.M. Dunnett p59
Multivariable decoupling pole assignment self-tuning feedforward controller. Z.-L. Deng and X.-R. Huang p85
Rule based identifier for unknown systems. H. Wang and A.H. Jones p500

NETWORKS

Distributed artificial intelligence approach to air traffic control. N.V. Findler and R. Lo p515
Neural networks for nonlinear internal model control. K.J. Hunt and D. Sbarbaro p431

NOISE AND INTERFERENCE

Empirical comparison of methods of fuzzy relational identification. B. Postlethwaite p199

NONLINEAR SYSTEMS

Adaptive general predictive controller for nonlinear systems. Q.M. Zhu, K. Warwick and J.L. Douce p33
Chaos prediction in nonlinear feedback systems. R. Genesio and A. Tesi p313
Controller design of multivariable variable structure systems with nonlinear switching surfaces. D.S. Lee, M.G. Kim, H.K. Kim and M.J. Youn p493
Feedback stabilisation of synchronous generator by extended linearisation. P. Woźniak and K. Kuźmiński p363
Model reference control of nonlinear plants with uncertain and unbounded terms. Y. Stepanenko and J. Yuan p535
Observations-weighted optimal control of a class of nonlinear systems. M.J. Grimble and S.A. Carr p160
Self-adaptive design of a nonlinear temperature control system. A. Chotai, P.C. Young and M.A. Behzadi p41

OPTIMAL CONTROL

Application of stochastic optimal control to thin rib machining. M. Anjanappa, D.K. Anand and J.A. Kirk p228
Discrete-time optimal control for linear time-delay systems with deterministic disturbances. T.-T. Lee and C.-L. Shih p573
Eigenstructure assignment in high-gain feedback systems. S. Sen and K.B. Datta p165
Observations-weighted optimal control of a class of nonlinear systems. M.J. Grimble and S.A. Carr p160
Optimal model-following control of a positioning drive system with a permanent-magnet synchronous motor. P.M. Pełczewski, W. Oberschelp and U.H. Kunz p267
Optimal tracking with previewed commands. M.E. Halpern p237

OPTIMISATION

Optimal controller with prescribed dominant energy eigenvalues. C.M. Liaw p405

PHYSICAL PROPERTIES

Electro-rheological valves in a hydraulic circuit. A.J. Simmonds p400

POLES AND ZEROS

Hybrid state-space self-tuning control using dual-rate sampling. L.S. Shieh, X.M. Zhao and J.W. Sunkel p50
Identification for long-range predictive control. D.S. Shook, C. Mohtadi and S.L. Shah p75
Multivariable decoupling pole assignment self-tuning feedforward controller. Z.-L. Deng and X.-R. Huang p85
Sequential design of multivariable control systems. J. Van de Vegte p103
Tracking periodic inputs using sampled compensators. G.F. Ledwich and A.G. Bolton p242

POWER ELECTRONICS

Recursive approach to optimal control problem of multiarea electric energy system. J.A. Momoh and X. Shen p543

POWER SYSTEM PROTECTION

Feedback stabilisation of synchronous generator by extended linearisation. P. Woźniak and K. Kuźmiński p363

POWER SYSTEMS AND PLANT

Model reference adaptive control for large scale systems with application to power systems. H. Yousef and M. Simaan p321

PROCESS CONTROL

Artificial neural networks in process engineering. M.J. Willis, C. Di Massimo, G.A. Montague, M.T. Tham and A.J. Morris p256
RESCU: a real-time knowledge based system for process control. R. Leitch, R. Kraft and R. Luntz p217

SIMULATION

Adaptive control of a single-link flexible manipulator with unknown load. T.-C. Yang, J.C.S. Yang and P. Kudva p153
Application of generalised predictive control to a boiler-turbine unit for electricity generation. J.A. Rossiter, B. Kouvaritakis and R.M. Dunnett p59
Artificial neural networks in process engineering. M.J. Willis, C. Di Massimo, G.A. Montague, M.T. Tham and A.J. Morris p256
Empirical comparison of methods of fuzzy relational identification. B. Postlethwaite p199
Generalised minimum-variance stochastic self-tuning controller with pole restriction. C.C. Hang, K.W. Lim and W.K. Ho p25
Hybrid state-space self-tuning control using dual-rate sampling. L.S. Shieh, X.M. Zhao and J.W. Sunkel p50
Multivariable self-tuning regulator for load frequency control system with interaction of voltage on load demand. K. Yamashita and H. Miyagi p177
Neural networks for nonlinear internal model control. K.J. Hunt and D. Sbarbaro p431
Parameter transient tracking for recursive estimation. R. Fernandez del Busto, P.E. Wellstead and M.B. Zarrop p68
Robust identification of stochastic linear systems with correlated noise. C.-B. Feng and W.-X. Zheng p484

STABILITY

Agile computer control and surveillance systems. R. Whalley p185
Feedback stabilisation of synchronous generator by extended linearisation. P. Woźniak and K. Kuźmiński p363
Linear feedback approach to the stabilisation of uncertain discrete systems. E. Gyurkovics p507
New bound for the stability margin of linear continuous systems. V. Sreeram and P. Agathoklis p151
New method of robust pole assignment by output feedback. J. Changsheng p172
Observations-weighted optimal control of a class of nonlinear systems. M.J. Grimble and S.A. Carr p160

Robustness effects of a prefilter in generalised predictive control. B.D. Robinson and D.W. Clarke p2

SWITCHES AND SWITCHING THEORY

Controller design of multivariable variable structure systems with nonlinear switching surfaces. D.S. Lee, M.G. Kim, H.K. Kim and M.J. Youn p493

SYNCHRONOUS MOTORS

Optimal model-following control of a positioning drive system with a permanent-magnet synchronous motor. P.M. Pelczewski, W. Oberschelp and U.H. Kunz p267

TRANSDUCERS

Strip speed measurement using distributed infra-red detectors. E.M. Deeley and P. Kontopoulous p395
